*Rand article from wiki

The moving images of a film are created by photographing actual scenes with a motion-picture camera, by photographing drawings or miniature models using traditional animation techniques, by means of CGI and computer animation, or by a combination of some or all of these techniques, and other visual effects. Before the introduction of digital production, film was a physical strip of film consisting of a series of static or still images of live action photographed at the rate of 24 frames or images per second. When the images are viewed at the same rate the illusion of motion is the result of what is called persistence of vision, the fact that the mind cannot process individual images at that speed, so the images merge together to produce the illusion of motion within the image. If the film is an animation of any kind, the widely separated in time images are planned to be seen at the standard speed.

Open content film Main article: Open content film An open content film is much like an independent film, but it is produced through open collaborations its source material is available under a license which is permissive enough to allow other parties to create fan fiction or derivative works, than a traditional copyright. Like independent filmmaking, open source filmmaking takes place outside Hollywood, or other major studio systems.For example, the film Balloon was based on the real event during the Cold War.15

Other major films have postponed releases in certain countries. The Pixar film Onward, released on the opening March weekend, was not opened in the areas most affected by the coronavirus outbreak while cinemas were closed in China, it also chose not to open in South Korea, Italy or Japan.90 Other March 2020 releases A Quiet Place Part II and Mulan postponed their releases in affected areas, too. This prompted worry that, should March film openings underperform, blockbusters set for release in May specifically DisneyMarvels Black Widow and Universals F9 would move their dates later in the calendar.187 Mulan not

opening in China, where it aimed to make most of its money, was particularly concerning,91 especially with the possibility that pirate copies will appear and prevent Chinese moviegoers from going to see it in cinemas when it is released.9 Comparatively, A Quiet Place Part II had not anticipated a large Chinese draw, as the box office for the first film in the country was only 10% of its total.7
